

INTRODUCTORY NOTES**INDEX OF MARRIAGES FOR THE CHURCH OF ST. LAWRENCE AT WESTBURY SUB MENDIP****DATE AND VERSION**

Date of issue is 18 February 2019; version number 3.0.

UPDATE POLICY

Updates will be issued when significant new data becomes available, either in the form of additional information or amendments to existing information.

DATA SCOPE AND SEQUENCE

This datafile contains details of marriages recorded in Westbury church archives covering the period 1654 - 1920 together with a small number of entries obtained from the Bishop's Transcripts relating to the years 1607 to 1654. There are two entries for each marriage; both entries contain the same information, but one has the groom's surname as the primary reference, the other the bride's. The datafile is presented in alphabetic sequence of surname; for individuals with the same surname the sequence is by first forename and then second forename. Where surname and forenames are the same the sequence is by earliest date of marriage.

DATA SOURCES

Information has been obtained from the following sources:

- Marriage Register 1838 - 1920 (held in St Lawrence's Church, Westbury sub Mendip)
- Marriage Register 1813 - 1837 (held at Somerset Heritage Centre in Taunton)
- Marriage Register 1755 - 1812 (held at Somerset Heritage Centre in Taunton)
- Parish Register of Births, Deaths and Marriages 1713 - 1783 (held at Somerset Heritage Centre in Taunton)
- Parish Register of Births, Deaths and Marriages 1654 - 1712 (held at Somerset Heritage Centre in Taunton)
- Bishop's Transcripts, miscellaneous extracts 1607 - 1837 (held at Somerset Heritage Centre in Taunton)

It should be noted that the above records are not always complete. There are potential gaps in recording around the times at which there is a change of register and there are no marriages at all recorded in the years 1889, 1893 and 1895. An area of particular concern in the registration of marriages is that there is only one record of a marriage at Westbury between the years of 1713 and 1732. This was a period in which clandestine marriages were relatively common (leading to the Marriage Registration Act of 1754), but it is still hard to believe that there were so few marriages in Westbury during this period.

DATA CONTENT

The contents of each column in the datafile are described briefly below.

Surname, Forename 1, Other Forenames

The contents of these columns are self-explanatory. As entries in the registers are not always clear, there has inevitably been some degree of interpretation in determining surnames and forenames. In addition, spelling of names varies considerably, depending upon, or in some cases, regardless of the person making the register entry. Again, some flexibility on the part of the reader will therefore be required; for example, a surname of 'Collence' may relate to 'Collins' while an entry of 'Wreid' might be interpreted as 'Wride' or 'Reid'. The possibilities are, if not endless, still considerable.

Sex

M = male, F = female.

Age

Where the age of the bride or groom is given as a number of years, this will appear here as a numeric value, e.g. 25.

If no age is given - and this is typical of earlier marriage records, then this column is blank.

Some marriage records simply indicate whether the bride / groom was of full age (usually interpreted as being 21 or over) or a minor (usually interpreted as being under 21); in these cases the entries are F or M respectively.

Status (ST)

B = bachelor

S = spinster

W = widow or widower, as appropriate

blank = unknown / unspecified

Profession

This entry specifies the profession or occupation of the bride / groom at the time of the marriage.

For the most part, this entry is blank in the case of the bride - and in early records, also for the groom, since this information is not specified in the registers.

Parish

Where known, this identifies the parish in which the bride / groom was resident at the time of the marriage.

Date of marriage

Where known, this contains the date of marriage in the form DD MM YYYY.

Surname, Forename1, Other Forenames**Sex****Age****Status (ST)****Profession****Parish**

All of the above fields are then repeated to provide the details of the other party to the marriage.

Register Ref

This entry identifies the source document from which details of the marriage have been obtained and, where appropriate, gives a line reference within the source document. The entry is in the form 'document reference / line reference'

The following designations are used to identify the different source documents:

BTnn/Mnn - Bishop's Transcripts where nn = a number which identifies the position of the document fragment on the Somerset Heritage Centre fiche, reading from the top left hand corner, and Mnn = the sequence number of the marriage in that fragment.

MAR1838 - Marriage Register from 1838 to 1920

MAR1813 - Marriage Register from 1813 to 1837

MAR1755 - Marriage Register from 1755 to 1812

MAR1713 - Register of Births, Marriages and Deaths from 1713 to 1783. This register contains a number of marriages covering the period from 1713 to 1754; at that point a separate marriage register was begun. Marriages from this register have been allocated a reference number in ascending sequence of their occurrence in this register.

MAR1654 - Register of Births, Marriages and Deaths from 1654 to 1712; this register also contains details of births and deaths in the same period. Marriages have been allocated a

reference number in ascending sequence of their occurrence in this register.

RTnn - there are a small number of marriages, typically from the period around 1800, where the details have been obtained from a handwritten list of marriages compiled by a lay member of St. Lawrence's Church, but where the corresponding details do not appear in the appropriate marriage register. It seems likely that these entries were found in a workbook from which the official marriage register would be compiled; unfortunately no evidence of this particular workbook can be found, although an example of a similar workbook recording births and deaths for Westbury sub Mendip has been found.

Banns / Licence (B/L)

B = banns

L = licence

blank = unknown / unspecified

Witnesses

Where the register records the names of witnesses to the marriage, these are listed here. The number of witnesses seems to vary - from as few as one, to as many as seven.

Parents - Groom

Details of the groom's parents were occasionally apparent in the early registers, but became commonplace from 1838, particularly with respect to the father and his profession or occupation. Where details are available, they are shown here.

Parents - Bride

As for Parents - Groom, see above.

A small number of entries have three red asterisks in a specific column, mostly 'Witnesses'. This indicates that a small amount of additional information may be available, but does not fit the box.

The data recorded in these notes is not directly accessible in this database, but the information can be obtained by contacting the correspondence email address specified on the home page for the Westbury-sub-Mendip parish registers.

Caution: Many entries in the registers, particularly the older registers, are difficult to read. Entries have faded, handwriting is far from clear, writing conventions for particular characters vary according to the style of the person entering the information and spelling can be both phonetic (e.g. 'Alice' may appear as 'Alas') and idiosyncratic.

You should therefore be prepared for inaccuracies in the data (as a result of my failure to interpret the information correctly - or to key it in correctly).

You should also be prepared to look for alternative spellings of surnames in which you may be interested, since they could appear in a variety of different guises, either as a result of the original recording or my failures in transcription.
